SXR AUDIO STAND

“Once you experience first-rate resonance control, you cannot go back.”

“A lot of equipment -- much of it good and a good deal of it better than that -- has graced my listening room since Mike Latvis... of Harmonic Resolution Systems came to my home several months ago.... Still, at the end of the review cycle, almost all of them have gone back from whence they came. Not so the HRS equipment rack; it's not going anywhere.”

Jules Coleman, 6moons

The **SXR Audio Stand** is a high performance design that eliminates noise revealing a new level of musical performance. The frame is manufactured from billet-machined aircraft aluminum and strategically placed polymer damping elements. This innovative design concept produces configuration flexibility and exceptional performance. The highly acclaimed HRS isolation bases load directly into the SXR frame as the shelf system. The SXR frame optimizes isolation base performance while offering infinite configuration flexibility and functionality.
